

PT. Sasana Antik

A COMPANY PROFILE

about us

Indonesian furniture companies already have names all over the world. With teak wood, Indonesia's furniture products have flown smoothly to many countries.

One of the exporters as well as furniture manufactures that is well known in the world is PT Sasana Antik Furniture.

10 years of wandering in the furniture industry is enough for Sasana Antik to make many breakthroughs to promote its business. One of them is establishing a representative in Austria under the name Kayusa GmbH which will start operating later this year.

ARIFIN
CEO SASANA ANTIK

networks

The advantage is that we use used teak wood and has been certified by the Forest Stewardship Council (FSC) from Smartwood. We also offer to customers non-teak used wood such as boat wood, mixed wood, hard wood from Kalimantan. The response was good," said Arifin, CEO Sasana Antik.

Prior to establishing a representative in Austria, Sasana Antik did online marketing, participated in many international exhibitions, prepared various certifications according to global demand, and built a brand that represents exclusive and quality designs.

The biggest challenge today is to beat Vietnamese furniture products whose quality is not inferior to lower prices. However, they use acacia wood which is much cheaper than teak. This is our advantage. They don't have teak wood.

TEAK
LOVERS

teak wood

Also known as king of woods. Teak wood is a dense, close-grained type of hardwood that is sourced from the *Tectona grandis* tree, native to south and southeast Asia. Teak is originally golden in colour and has a smooth grain and texture.

It's high in natural oils and rubber, meaning it's strong, durable, and virtually impervious to extreme weather conditions and rotting, even if left untreated.

history

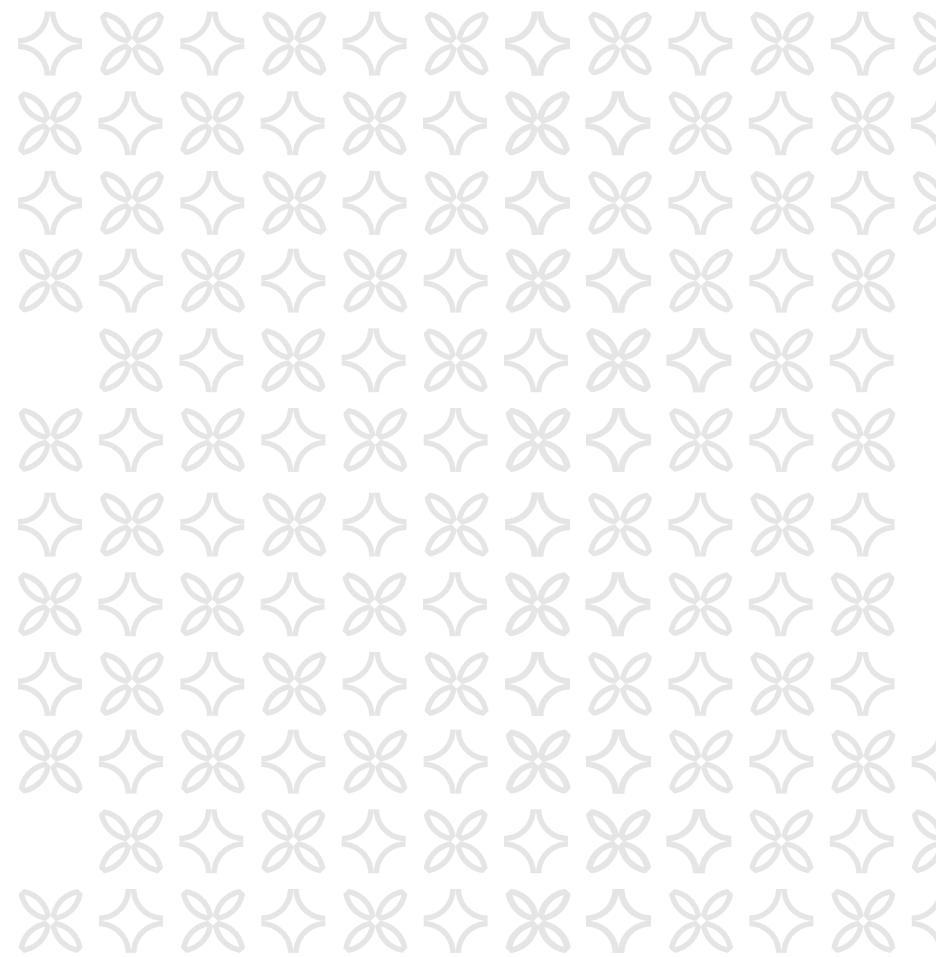

This is the advantage of having a network in European countries as the main export destination. Benua Biru is indeed the largest market for furniture products from Rembang, Central Java. Germany is the biggest. Followed by the Netherlands, France, Austria, Belgium, and Denmark. Next, there are Japan, Korea, and Australia from Asia.

Sasana Antik products include teak furniture, antique repro, garden furniture. All products are made from selected ingredients. The Company also uses recycled teak or dry old teak with a guarantee. The portion of indoor products, such as tables, chairs, and cabinets is 70% and the rest is outdoor.
